1948

"Lau Choy Seng, 劉再成" was established on 10 October, 1948 by Mr. Lau Chew Tat, with a vision of to be successful as it spells in the Chinese characters. Mr. Lau Chew Tat started the business for wooden chop making in a small shop along Temple Street, Singapore.

1960s

Shop relocated to 38 Temple Street, and continued its business. Mr. Lau Swee Hong, son of Mr. Lau Chew Tat joined the company at the 1960s.

1970s

In view of the potential in Food & Beverages Industry, the business started to diversify. Lau Choy Seng remained into kitchenware supply and mainly focused on Chinese Kitchens.

Lau Choy Seng began to sell export kitchenware from Hong Kong by the late of 70s in order to provide quality products at competitive price to the growing client base.

1990

Lau Choy Seng expanded again and rented a new warehouse at 20 Penjuru Road, 8,000 sqft. Lau Choy Seng has experienced many changes over the last few decades. Due to the paradigm shift the business grew in leaps and bounds.

1993

Lau Choy Seng relocated the retail outlet to 23 & 25 Temple Street that occupied two units of retail shop lots. A wider range of Chinese Kitchen Equipment added to the portfolio. Lau Choy Seng operated only with 1 van for delivery and 2 staffs.

As year continues client base grew even stronger. Lau Choy Seng moved towards supply and service from hotels to chain restaurants, from catering to institutional facilities and individual F&B outlet to walk-in retail.

2000s

Lau Choy Seng continued to seek for new opportunities, at the year of 2006 a significant progression- Lau Choy Seng first project established in Holiday Inn, Malacca - to supply internationally. Followed by few local major projects includes St. Regis Singapore, Resorts World & Marina Bay Sands.

1999

Due to the demands in F&B industry, Lau Choy Seng further expanded the warehouse from 8,000 to 20,000 sqft located at 86, Tuas West Avenue 11. This is to ensure that Lau Choy Seng being able to cater to meet requirements and needs from the clientele.

2007

Lau Choy Seng further expanded the warehouse from 20,000 to 45,000 sqft at 30 Tuas West Ave 11.

2010

Lau Choy Seng is now direct distributor and stockist for more than 35 brands and have over 20,000 products in our stock list for Tableware, Barware, Cutlery, Chinese, Japanese and Western kitchenware, Food Service equipment. In addition, we also produce house

brand of quality stainless steel pots and pans, Chinese kitchen knives and tools, kitchen equipments, chef coats, umbrellas and aprons.

2015

Today, Lau Choy Seng established a new branch office & showroom in Malaysia, named LCS Hospitality Solutions Sdn Bhd in order to service the growing clientele better.

PIAZZA 5 Stelle

- Thick • Tough • Wear-resistant • Fine Finish • Indestructible welding • Hollow ergonomic handles

The 5-Stelle collections are the fruit of advanced, constant research that puts Piazza in the avant-garde of The sector.

The handles, with a wide, solid grip, are patented, and in fact some aspects such as the curvature which facilitates their handy grip, the cavity which avoids burning the hands, the pads at the points where they are welded to the body which makes the handles hermetically sealed, resulted in the creation of a determining element for the definition of product quality.

The bodies are thicker than any in the category and the well-finished shine is a guarantee of long life. The heat diffuser with insert in aluminium and stainless steel base, can be used on all sources of heat, from traditional to induction.

Lastly, the collection come in a vast and complete assortment of sizes.

Tribute® 3-Ply Stainless Steel Cookware

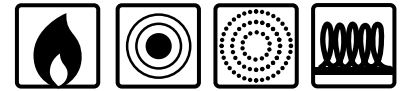

Setting the Standard™

New Trivent® Handle has a unique ergonomic design that reduces stress and fatigue. The vented handle design reduces heat transfer from pan to handle, maximizing operator comfort.

Trivent™ Silicone Handles are rated at 450°F (232°C) for stovetop or oven use.

18-8 stainless interior does not affect colors and flavor of food.

18-0 stainless exterior induction ready.

EverTite™ Riveting System offers a lifetime warranty against loose rivets.

3-Ply construction maintains shape under constant commercial use.

3004 aluminum core provides even heat on bottom of pan and side walls.

Affinity

THE SOLUTION FOR BUFFET

The Affinity® utensils range does away with the cumbersome chafing-dish, bringing a touch of sophistication and elegant appeal to your buffets and aperitif dinners, all at a reasonable price and with the practical benefits that this new collection offers.

ELEGANT

The Affinity and Mini-Affinity stainless steel casserole dishes, mini saucepans and mini sauté-pans are a sophisticated and tempting way to serve an extensive and varied selection of sweet or sour, hot or cold meals straight to table, giving your buffets an undeniable added value.

From oven to table, the mini Affinity® is the ideal choice for presenting your dishes in open and table-top kitchens.

PRACTICAL FOR EVERYONE

Buffets are easier to prepare; the utensils can be refilled with food as the meal progresses, and they keep the food hot.

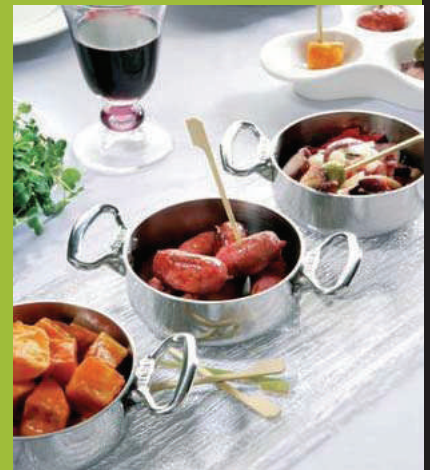

The single servings delivered by the mini-Affinity range provide just the right portions for the number of guests, with little time needed to lay them out on the table. Guests can serve themselves in comfort, no longer having to grapple with a chafing-dish.

ALWAYS HOT

The material used in the Affinity range spreads the heat throughout the whole of the utensil rather than concentrating it at the bottom, to give you food that is heated evenly and for longer.

READY IN AN INSTANT

Perfect for «Live cooking stations» where the dish is prepared specially for and in front of the guest. The reactive material used in the Affinity range heats the food very quickly and evenly so your food is ready without delay. Its elegant style is perfect for preparing the food in front of the customer.

AUTHENTIC

Generous sizes, rounded edges, pouring lips:
Affinity is a true professional utensil dedicated to French Gastronomy.

ERGONOMIC

Curves and smart handles designed by de Buyer. Ergonomic handles
-made of cast stainless steel- for a natural grip without tiredness.

PROFESSIONAL QUALITY & ROBUST

Multilayer and multimaterial. Composite material made of stainless steel
and aluminium. For an ultra-fast and homogeneous cooking.

ALL HEAT SOURCES INCLUDING INDUCTION

Easy clearing. Dishwasher safe.

Camwear® Polycarbonate Food Pans

Store, transport and serve all in one pan. Camwear food pans are made from durable polycarbonate that will not crack, bend or dent. Precisely designed to Gastronorm GN specifications, with a large radius bottom to reduce food waste. At half the cost of stainless steel, Camwear pans keep contents as cold as metal pans with less condensation. Pans stack neatly without wedging or sticking.

X-Pans™ High Heat Food Pans

Cambro® High Heat X-Pans™ withstand and adapt to different temperatures cold to hot, thus expanding functionality and reducing unnecessary handling. The new temperature tolerance on High Heat X-Pans makes them ideal for high-heat cooking and reheating applications. High Heat X-Pans are available in Onyx and Sandstone, designed to enhance merchandising of food, making it more appealing for deli and service lines.

- Ideal for use in microwaves, steam tables, ovens and hot holding applications.
- Reduces handling – high heat food pans can go from prep, to cooler, to oven to hot holding application at temperatures ranging from -40° to 375°F (-40° to 190°C).
- New colors designed to enhance merchandising of food, making it more appealing for deli and service lines.
- Non-stick smooth interior surface increases yields and promotes easy cleaning.
- Pans stack neatly, without wedging or sticking.
- Commercial dishwasher safe.

LIGHT&STRONG

Material

The Innovative Composition Of Nylon And Fiberglass Matches Stiffness, Great Mechanical Strength And Extraordinary Lightness. It Stands Temperatures From -30°C To +170°C, Is Dishwasher Safe And Fully Complies With Eec And Fda Standards.

Rack

The Perfectly Adjusted Mechanism Provides Excellent Sliding With Minimum Pressure Effort, Then Cutting Down Fatigue And Tiredness.

Strip

Made Of Stainless Steel, It Provides The Best Cut Of Ice-cream And, Together With The Polished Cup, Always Results In Perfect Shape Scoops.

Rod And Spring

They Are Also Made Of Stainless Steel And Their Operation Is Unparalleled; They Are Very Strong, Have A Long Life And Their Operation Undergoes No Change.

Central Hub

Careful Check On Allowances, First During The Molding And Then The Assembly Stage, Guarantees, Together With Compact Design, Top Hygiene Of The Scoop Because There Are No Areas Where Residues Of Dirt Can Settle.

Handle

Perfectly Ergonomic And, With Its Special Matte Surface, It Is Fully Anti-slip For A Strong And Safe Grip At All Times.

The Alma Kaiman tongs are added to the popular Alma Test tongs, extending the wide range of PIAZZA kitchen tongs. The original idea by Luciano Tona has been turned into reality thanks to the design by Michele Capuani. Specifically conceived for fish.

- PRECISION FISH BONE REMOVERS
- REAR NOTCHES FOR PERFECT FISH SCALING
- NON-SLIP RIDGES FOR A SECURE GRIP

A new tool measuring just 13.5 cm that's bound to become indispensable for all catering professionals as it offers so many different functions:

- SPOON FOR TASTING FOOD
- TONGS FOR ASSEMBLING PREPARATIONS WITH SURGICAL PRECISION
- SCALED MEASURE (0.5 CM)

PIAZZA's tongs have always been the collection used as reference point for the market, both for design and for the effective superiority of a product that is a must for every professional's collection. Lastly, the details highlight the uniqueness of each individual pair: the curvature of certain applications, such as the spaghetti tongs, which is like an invitation to gather up the food in the best way; or the spring which always gives the same manoeuvrability even after an infinite number of pressing, this thanks to an exclusive production device which is still secret today, as are the formulas which for years have resisted all attempts of imitation. Precisely this certainty permits Piazza alone to guarantee the inalterability of its tongs.

Built to be both tough and sanitary. A textured, slip-resistant, easy-to-clean polypropylene handle withstands both high and low temperatures. An impervious blade-to-handle seal provides the utmost in sanitary qualification. Stain-free, high-carbon steel blade, with an individually ground and honed edge, excels in commercial use. Made in USA. Items marked with the NSF logo are NSF Certified.

Colour Coded Cutting Boards

Safe food preparation is simple with the Colour Coded System that takes the risk out of cross-contamination. The boards are colour-coded by food group & they are non-absorbent and won't harbor foodborne bacteria. PE Boards surface won't dull knives, chip, crack, peel or warp. They're dishwasher safe and contamination can be further reduced with our matching Colour Coded knives & Brushes to complete a solution for food safety..

High Density Polyethylene Cutting Board

ColorCode cutting boards are the ultimate defense in the prevention of cross-contamination. Exceptionally durable and essential for safe food preparation. The high-density polyethylene is dishwasher safe. Made in the U.S.A.

Simply Better Meat Tenderizer 松肉器

- Meat Maximizer™ 15 & 45 Blades Meat Tenderizer with Removable Blade Cartridge
- Used by cooking enthusiasts' kitchens around the world.
- The patented, removable blade cartridge makes clean-up a snap. So easy to clean - the product has earned NSF certification - the only hand-held tenderizer in the industry with such recognition.
- Assembles and disassembles in just seconds.
- Fifteen Razor sharp knife blades cut through connective tissues that can make meat tough. Easy to use, this age old technique known as "jaccarding" makes faster, more flavorful, more tender meat! Helps to retain your meat's natural juices.
- Perfect for beef, chicken, pork, veal, turkey and game - readily penetrating flavor deeper into your favorite cuts.
- Reduce cooking time by up to 40 percent while helping meats to cook more evenly.
- Improves yield and "plate coverage" by reducing shrinkage.
- Tiny "heat channels" are created, resulting in faster penetration of marinades, providing more even cooking throughout the meat, and significantly reduced cooking times - all without changing the shape or appearance of your meat.
- Made of FDA compliant ABS and genuine 300 Series stainless steel metal components.
- Highest quality stainless steel results in sharper blades that will not dull, discolor, rust or change shape over time. Knives measure 50 RHC and are sharpened on both sides for prolonged performance that stays sharp - even after frequent use.

Dishwasher safe (top shelf recommended).

Super Tendermatic Meat Tenderizer 松肉器

- The Original Super Meat Tenderizer™
- Professional quality, 48 knife hand-held meat tenderizer
- Used in great restaurants around the world.
- Achieve better cooking results from less expensive cuts of meat or enhance the flavor and texture of even the finest meats with the original multi-knife, manual meat tenderizer.
- Razor sharp knife blades cut through connective tissues that can make meat tough. Simple to do, this age old technique known as "jaccarding" makes more flavorful, more tender meat! Also helps to retain your meat's natural juices.
- Perfect for beef, chicken, pork, veal, turkey and game - readily penetrating flavor deeper into your favorite cuts.

6011230	30 x 15	7	flexible ring

- Half-round copper mixing bowl designed for quickly beating egg whites.
- An essential hemispherical shape which helps incorporate air into the whites and which enables you to easily beat all the mixture preventing spillages.
- Thanks to copper: egg whites are beaten quicker; they are stiffer and whiter.
- Open rolled edge, ergonomic and functional: a safe grip, strong, simple and comfortable for a dynamic whipping; facilitates maintenance.

Flexipan® The Original Flexible Mould

has developed a combination of glass fabric and foodgrade silicones: the Flexipan®.

This flexible mould, which was a real revolution for Food professionals, was quickly copied by the silicone injection technics but Flexipan® remains unique with its hither to unequalled quality. Flexipan® can be easily recognized by his knitted fabric structure, especially on the reverse side of the mould. Thanks to its unique combination, Flexipan® is not only a solid and longlasting material, but it also offers exceptional non-stick properties.

Flexipan® has a much longer life than any traditional non-stick coating. Depending on the product, it can be used 2000 to 3000 times before the first signs of sticking appear. Flexipan® can be used to bake or freeze most sweet and savoury products normally metallic moulds. Flexipan® can be used at temperatures varying from - 40°C to + 280°C.

Flexipan® conforms to French, European and US regulations on silicone products in contact with food. Flexipan® has also obtained the N.S.F® certification (National Sainitation Foundation) in February 1997 which guarantees it conforms to construction and performance standards amongst the most demanding in the world. It guarantees to the user of the products complete security as far as hygiene and non toxicity are concerned. Moreover, Demarle can claim to conform to the FDA (food and Drug Administration - USA) Norm. All the products have been approved by the National Test Laboratory (L.N.E).

Uses and recommendations.

Filling

Place your Flexipan® on the perforated baking sheet or grid before filling it to facilitate transport to the oven or the freezer. If some of the indents in the tray are empty, you are advised to fill them with a piece of dough or with water. If not, the indents could lose their non-stick properties.

Baking

The Flexipan® can be used in any oven, ventilated or deck oven. Temperatures and baking times need to be adjusted depending on the oven used. We recommend to reduce the temperature by 10oC and bake a bit longer than in metallic moulds. Flexipan® should be used on a perforated aluminium sheet or grid to maximise the circulation of air. Generally speaking, small pieces should be unmoulded once out of the oven. For fragile product such as sponge cakes and dacquoise sponge, you are advised to let the product cool before unmoulding.

Unmoulding

Depending on the products, unmoulding is easily made either by bending the mould around the frozen products (mousses or crème brulee) or the gelified products or by turning the mould upside down for baked products. In the case of small products, one can even remove them at once just by lifting an edge of the Flexipan® tray.

Cleaning

To clean, simply soak the mould in hot soapy water using a non abrasive sponge and a non aggressive detergent(neutral Ph = 7). Caution: a very aggressive detergent (too acid or too basic) will damage the mould very quickly. You are advised to wash Flexipan® very regularly since, over time, accumulation of grease is detrimental to the durability of the material. After washing, placing the Flexipan® tray in the oven at 150oC for two minutes, will sterilise it and make it perfectly hygienic.

Storage

Flexipan® trays should preferably be stored upside down in piles of 6 at the most. For a few shapes, very deep and straight (like Heart shapes and Cylinders shapes), we strongly recommend you to stock them by pile of 2 mats. If not, after a few months, the mould can lose its original shape for ever.

Silform® for Choux Pastry 60 x 40 cm

Several Silform® shapes have been specially developed for choux pastry. Thanks to the round or elongated shapes, piping choux pastry is easy and products are evenly calibrated. The choux pastry which has a naturally supple texture* glides and fits perfectly the silform® shape. The choux pastry does not need to be glazed or scratched. It is preferable to bake the choux pastry in a deck oven. When removed from the oven, the finished product will be perfectly even and smooth on top. Thanks to the non-stick texture of Silform®, tipping out is faultless. The bottom is light and clean which means that the choux is stable and ready to decorate.

Silform® for Tartlets 60 x 40 cm

Producing tartlet bases (part or fully baked) has become much easier with the new range of Silform® Tartlets. No need to prick or to line the dough, or even to garnish with dry beans anymore. You can even use the mat on the reverse side!

Due to its silicone components, this mould is non-stick and therefore doesn't need greasing. Moreover, the perforated texture of the Silform® allows a perfect and uniform, heat diffusion for an optimum quality of baking and a perfectly crusty pastry.

silikomart[®] professional

The moulds made of 100% silicone suitable for alimentary use from Silikomart Professional, are ideal for the preparation of sweet and salty recipes. Light, resistant and practical are the best alternative to all baking trays and moulds made of other materials.

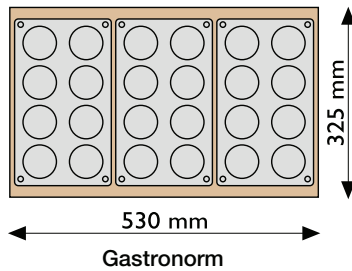

They can be used while cooking in the gas or electric oven, in the grill; on the wire rack shelf, in the microwave and to consolidate in the freezer or in the blast chiller: it resists temperatures from - 60°C to + 230°C, can be transferred directly from the

freezer to the oven without any variation in material characteristics.

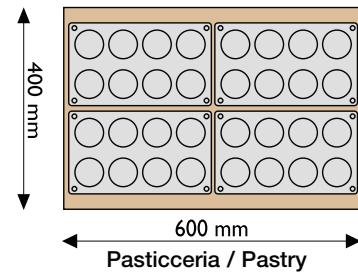

The thermal conductivity of the silicone guarantees excellent results when baking, while the natural non-stick ability and flexibility, allows quick, easy and perfect turning out, reducing loss of time and of ingredients

They can easily be washed under hot running water, with a sponge, or in the dishwasher. They can be stored using minimal space; folded or rolled, as they always return to their original shape. The correct use guarantees a superior duration to other traditional products.

QUENELLE²⁴ 6183304

Size: 63x29 h 28 mm
Volume: 24 ml

Silikomart Professional presents a new, elegant shape perfect to create 3D sweet or savoury quenelle. This mould is conceived and made with maximum care combining beauty and handiness. The new shape is provided with a special and innovative border in the upper part which gives a particular round shape to the base of pastries. This new technology and the flexibility of the high quality guarantee an easy and perfect unmould in every single detail, ensuring perfect results and total fidelity to the shape. An inevitable tool in every laboratory, **QUENELLE²⁴** therefore it is suitable for semifreddos but also for ice cream and baked creations.

Use:

• Fill the mould

• Cover with sponge base

• Unmould

INSERT DECOR ROUND 6183401

for creation from Ø40 up to Ø 260 pitch 20 mm

Designed to make square or circular shaped inserts and decorations to be placed inside or on the surface of ice cream cakes, semifreddos or baked preparations, **INSERT DECOR** is thought to enhance with originality and elegance the creations of professionals. Extremely practical and functional, Insert Decor allows to make decorations of 12 different sizes (6 for each side of the mould), resulting suitable for preparations of the most different sizes.

• Fill the mould with the preparation

• Unmold

• Create the ice cream base for the TOR mould.

• Put the cake-insert in the TOR.

• Cover the insert with the preparation.

ARMONIA 6183402

Size: Ø 180-40 h 50 mm
Volume: 1000 ml

INSERT
DECOR ROUND

6183401

Elegant waves wrap delicate notes of taste. Style and elegance, that's what distinguishes this mould with a unique shape. Created in collaboration with the Team Italia composed by the president Gino Fabbri, the captain Lucca Cantarin, Francesco and Marcello Boccia and the coach Alessandro Dalmaso, ARMONIA is perfect for ice cream but also baked preparations, ensuring flawless results.

Use:

- Fill 1/3 of the Armonia mould with the first preparation

- Put the preparation of the Insert Decor Round mould into the Armonia mould

- Fill up the mould to the top with the second preparation

- Level

- Cover with sponge base

- Unmould

- Create the ice cream base in the TOR mould.

- Cover and level it; put the mould with the corresponding tray into the shock freezer.

- Take the cake out of the mould.

- Put the decoration on the TOR.

ECLIPSE 6183601

Size: Ø 180 h 45 mm
Volume: 1000 ml

Essential, sinuous, with a round shaped surface.

Eclipse differs from all the other baking pan moulds because it is equipped with two silicone parts, one of which (A) extremely flexible, apt to further simplify the phase of unmould and to reduce the time of production during the processing.

Use:

- Fill 1/3 of the part B of the Eclipse mould with the first preparation

- Put the sponge base (SQ012 - Disco)

- Close up the Eclipse mould with the part A

- Fill the Eclipse mould with the second preparation

- Cover with sponge base

- Unmould

Enrober

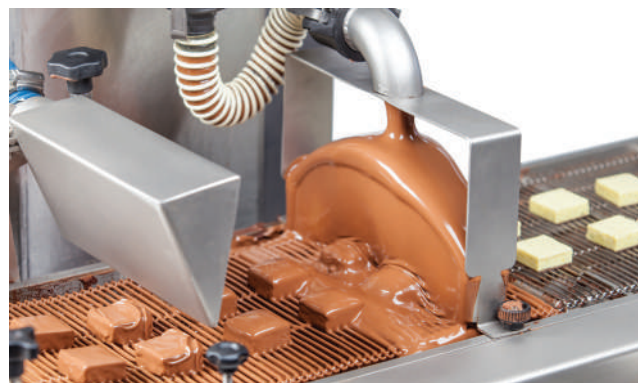

Enrober with double chocolate curtain, vibrating station, adjustable blowing unit, detailer, conveyor belt covered with paper (width 200 mm). The enrober automates the traditional, time-consuming coating of confectionery and fillings, increasing productivity and efficiency.

The thickness of the chocolate can be adjusted by the vibrating system (adjustable in intensity) and by the blowing unit (adjustable in height and intensity). At the end of the line, the product is placed on a conveyor belt covered with food-grade paper. The conveyor belt speed can be set by means of a regulator, adjusting the speed to the specific product and the number of employees.

Panning Machine

Designed specifically to simplify the task of coating products such as hazelnuts, almonds, pistachio nuts, pine nuts, coffee grains, etc....

The panning machine is ideal for small to medium-scale operations. The unit is completely manufactured out of stainless steel and is equipped with an effective and silent speed control. The panning machine has been patented because of special features, which includes:

- its compact size and
- its special sphere mounting system

The panning machine is suitable for a variety of different applications and the speed with which the sphere can be replaced makes product processing and cleaning tasks SIMPLE and EASY.

The panning machine is equipped with an integrated high-performance fan and duct that feeds filtered air into the bowl when necessary.

The silicon cooling-air nozzle is movable and removable to facilitate the processing of the product in the tray.

The Kitchen Assistant for Chefs

Emulsifying, grinding, mixing, chopping, blending and keanding are among the many functions carried out to perfection by the Robot Cook®. In addition, there is moduable heating capacity up to 140°C, accurate to the nearest degree. The large capacity bowl means you can produce sufficient quantities for professional needs.

The Robot Cook® stimulates the imagination of chefs. It is the ideal assistant when innovating and preparing a multitude of attractive, hot and cold, savoury or sweet recipes.

A meticulous assistant

- Easy to use with its variable speed function of 100 to 3,500 rpm.
- Refined dishes prepared in no time with its Turbo /Pulse rotary speed reaching 4,500 rpm per minute.
- Optimum control of food preparations possible with the high precision Pulse function.
- A mix of delicate products prepared without cutting due to the inverse rotation of the blade: the R-Mix® function
- Keeps the food preparation hot thanks to the intermittent function.

An autonomous assistant

Using the programming function, entrust your secret preparations to Robot Cook® and effortlessly reproduce your favourite recipes.

A dependable assistant

The powerful Robot Cook® relies on a very robust industrial induction motor.

A silent assistant

In the hive of kitchen activity, the chefs will appreciate its silence.

Add an eye-catching centerpiece to your business with the Buffet Enhancements stainless steel 3 tier (27") / 4-tier (40") commercial chocolate fountain! This 27" / 40" tall fountain features a fine brushed exterior with a 10 lbs. & 22lbs. chocolate capacity respectively, letting you load up on a large quantity of smooth, delicious chocolate. The movable tiers slide onto the center support tube with O rings so you can create your own shapes and patterns. Unlike other chocolate fountains, they are easily disassembles and packs into the included ABS carrying case, making it perfect for commercial use and transportation from event to event.

Designed specifically to provide reliable durability through repeated commercial use, this fountain's heavy duty main shaft bearing and 1 hp direct drive motor ensure long-lasting durability, while the chocolate is kept between 105 and 110 degrees Fahrenheit for maximum flow and flavour. A precision stainless steel auger circulates the chocolate from the bottom of the fountain back to the top, and the top cap, auger, outer tube, and tiers are all dishwasher safe for fast and easy cleaning.

Serie exhaust funnels	ø 10-18-25 cm
Dimension	49 x 37 x 120 cm
Weight	53 kg

- Simple and functional, the new IDRA hydraulic vertical sausage fillers feature a powerful hydraulic system that operates at a pressure of 120 bars.

Electric Bone Saw Stainless Steel Body

电动锯骨机

Code	8101200
Motor	1.5 hp / 1400 rpm
Voltage	230V, 50Hz
Blade length	1650 mm
Working surface	430 x 545 mm
Dimension	51 x 54.5 x 91.6 cm
Weight	39 kg

- Made out of stainless steel AISI 304.
- Interlocked bone chip tray accessible from outside (not on mod. Start).
- The door can be easily removed for smoother cleaning tasks (not on mod. Start).
- Calibrated pulleys built out of polished aluminium.
- Airtight bearings on upper pulley.
- Powerful asynchronous and ventilated motors protected by sealing oil sump.
- 24V controls with safety micro-switch on door and tray, redundant ECU and motor brake (EC).
- Quick upper pulley releasing mechanism that makes it easier to clean and change the blade.
- Easily removable and replaceable scrapers.
- Powerful 6 or 8 pole motors provide great power with little absorption (S02400 and S03100)
- Single-phase motors with heat guard (standard feature).
- Can be cleaned with a water spray (no high pressure).
- Controls in stainless steel class IP 67.
- The machines use tempered 16 mm blades to shred bone, frozen or fresh.

- Simple and sturdy machines that are safe and easy to use.
- Stand-alone structure made out of cast anodized aluminium, shiny, hygienic and rustproof.
- Features a counter, meat pusher and serving slicer in stainless steel AISI 304.
- 24V controls with safety micro-switch on door, redundant ECU and motor brake (EC).
- Utmost simplicity and accuracy when horizontally and vertically adjusting the upper pulley.
- Maximum blade adhesion to the pulley, thanks to the semi-curved shape of the pulleys and ideal adjustment.
- Airtight bearings on upper pulley.
- Smooth cleaning thanks to 2 special manufacturing details:
 - All the electrical parts are protected IP x5 or higher.
 - By simply unscrewing two knobs, you can remove the blade, upper pulley and its support, thereby making for a surface void of any encumbrance.
- Powerful asynchronous and ventilated 4-pole motors protected by sealing oil sump.
- The machines use tempered 16 mm blades to shred bone, frozen or fresh.

All the features of a high-end toaster with a low-end price. The Hatco Toast-Max economy conveyor toaster offers the flexibility and performance to perfectly toast bread and buns fast. Utilizing conveyor speed, not temperature, to determine toasting colour, allows for instant adjustment of toasting time.

- 4 position toast selector switch: off/toast/buns/standby mode.
- 89 mm clearance to accommodate high profile bread products.
- Easy-to-load rack with front or rear discharging.
- V-shaped reflectors help capture and redirect heat.
- Long lasting serpentine metal sheathed heating elements.
- 102 mm adjustable legs
- Pilot light that signals unit is in operation.
- Discharge & crumb trays are removable.

Quality-enhancing warming

Beat the peaks in your workday – keep quick-roast food and fried dishes in the Hold-o-mat until serving. The meal components are integrated directly into the prepared menus and served in succession. From now on, you can simply send out the tables stress-free – that's quality of life!

Cook & hold

Gentle low-temperature cooking with non-circulating heat – leave it to the Hold-o-mat and free up your combi-steamer for other jobs. Meat is cooked and kept warm with 10 % – 20 % less weight loss in the Hold-o-mat. This not only increases the tenderness of the meat but also has a positive effect on your profitability.

In the heat of the night

Simple overnight cooking – while you're enjoying a restful night's sleep, the Hold-o-mat cooks the next day's menu for you! Low-temperature cooking 'overnight' in the Hold-o-mat ensure that meat sauce-based dishes are tender and juicy, makes use of cheaper nighttime electricity rates and lowers your overall bill.

Portable – suitable for parties and outside catering

Food pre-prepared in the kitchen can be transported in the Hold-o-mat and served warm. From the Hold-o-mat direct to guests. The folding handles ensure optimum comfort from the kitchen to the delivery station.

Technical data:

- Precise temperature control thanks to the PT 500 system and its ingenious software
- Intelligent dehumidification system guarantees optimum warming conditions
- Can be built into all ranges and kitchen furniture
- Door hinging can be adjusted to open to left or right

FRONT COOKING

for professionals. The exceptional solution for mobile cooking systems – with ION TEC option.

When cooking in front of guests, professionals must be able to rely on their equipment completely. The BLANCO COOK cooking system passes this test with flying colours and accompanies you wherever cooking is expected to be a performance and savouring begins with watching.

The BLANCO COOK front cooking station is the heart of the mobile cooking system. With its highly efficient extraction and filter technology,

it ensures an optimum climate on the set and frees you from stationary extractor hoods.

The front cooking station is available for two to four cooking units. Thirteen different table-top cooking units enhance the front cooking station even further. They are all reliable, fast, powerful and thus ideal for professional use in canteens, restaurants and dining halls and on hotel terraces.

Another piece of good news: those who cook live using fresh ingredients can increase revenues by up to 40 percent with front cooking compared to classic preparation.

Treat yourself to state-of-the-art technology in a timeless design, select your own combination of front cooking station and cooking units – modern and functional from BLANCO COOK.

WITH A LICENCE TO BREATHE FREELY

The BLANCO COOK front cooking station.

Frying and sizzling, cooking and stirfrying result in cooking fumes which rise up. The extraction bridge of the BLANCO COOK front cooking station collects these fumes above the cooking units, which makes it significantly more efficient than other methods. Thanks to the slim design of the bridge, both the chef and guests have an unobstructed view of food preparation.

Large work surfaces and additional storage space provide enough room for the creativity of the participants.

Tested and proven:

powerful grease filters which correspond to Class A (DIN 18869-5) do not allow the penetration of any flames. This is confirmed by the fire-protection safety report carried out by an independent expert.

And with the optional ION TEC filter technology, BLANCO COOK achieves

even better results in the battle against cooking fumes, and for the first time, also filters blue smoke from the fumes.

The mood also remains high after the cooking show because all of the parts that need to be cleaned can be easily removed without tools and cleaned in the dishwasher.

BC-FS 4 front cooking station, customer side, with optional panelling and railing

**Well-designed down to the smallest detail:
the highlights of the front cooking station.**

Freedom for busy hands

Because the extraction bridge is so thin, more room is left for arranging and placing food.

BLANCO CONTROL – clear and simple

The electronic controller with clear symbols makes operating the front cooking station simple. The filter change indicator automatically reminds you to change or clean the filter.

Filter replacement – quick and easy

Simply lift the lid of the extraction bridge, remove the grease filter and put it into the dishwasher – without using any tools whatsoever.

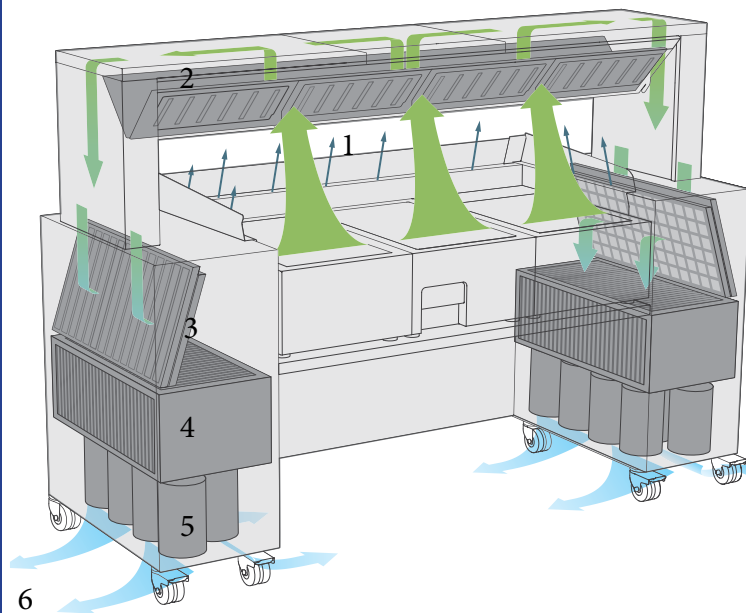

BC-FS 4 front cooking station, operator side, with optional railing, panelling and a comprehensive range of accessories

**BLANCO COOK
front cooking station**

- The extraction bridge offers ample space for ingredients or serving, whilst affording a clear view of the preparation process.
- Functional design with one-piece flat surfaces.
- Socket outlets behind the cooking units ensure cables are stored safely.
- Fans and filters can be accessed from the cooking side.
- Usable storage space below the placement niche.

FRESH AIR

Our multi-stage model for a comfortable atmosphere –
with ION TEC upon request.

How it works:

- 1 Suction results from a vacuum and draws the fumes into the extraction bridge. To further increase the extraction efficiency, the three-sided air flow also routes the fumes directly into the extraction bridge.
- 2 Grease is separated out and collected in catch trays in the extraction bridge.
- 3 Fleece filters absorb moisture and aerosols.
- 4 Odour particles and blue smoke can be reduced with the optional ION TEC filter system.
- 5 Activated charcoal reliably binds the odour molecules.
- 6 The cleaned air exits downward.

Clever options and accessories:
for individual workplace design.

Perfect protection

The one-piece sneeze guard ensures optimum hygiene. It can be easily folded down for cleaning.

Spotlight on

Integrated and flush LED spots illuminate the entire work surface ideally and put food in the right light.

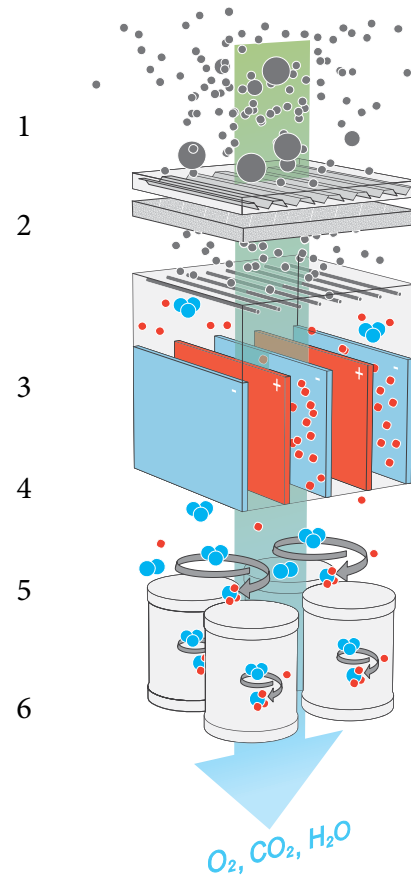

Please stand

Protected with a railing, the top of the extraction bridge can be used for presentation, decoration and provision.

The ION TEC filter system. Filters blue smoke and increases the service life of the activated charcoal.

How it works:

- 1 Large particles such as grease are separated out in the pre-filtering stages.
- 2 The particles which flow through the ioniser are charged positively by an electrostatic field. In addition, highly reactive ozone is generated from oxygen.
- 3 In the collector stage, the positively charged particles (especially aerosols) are attracted to the negatively charged plates and thus separated out.
- 4 In the oxidation process, the ozone eliminates odours and blue smoke.
- 5 Particles adhering in the activated charcoal which were not yet separated out react with the residual ozone. This cleans the activated charcoal and significantly increases its service life.
- 6 Oxygen, carbon dioxide and water are released into the environment as end products.

Creates space: multi-frame

The multi-frame offers space for secondary activities such as setting down and storing items. Simply insert a GN container or lay in a glass shelf to create an additional work surface.

Rails for any situation

Please insert anything which should be stored directly under the cooking units here. Food and cooking utensils can disappear into GN 1/1 containers of any depth.

Instant conversion

The cooking unit placement shelf can be easily removed, e.g. to make room for a fixed-position floor unit.

NEW GENERATION

Flexible and reliable assistants on set: everything for heating up and keeping hot.

Filling rush orders: grilling, stir-frying, cooking – these compact, strong assistants make chefs happy! Teams of modular table-top cooking units from the BLANCO COOK system assist kitchen professionals.

The new generation of table-top units unveils a new product design and is 100 % "made in Germany". Good to know: they are compatible with all previous BLANCO COOK units.

New additions: two intelligent induction hobs and the large, highperformance griddle have been energetically optimised.

The induction technology from E.G.O. (Oberderdingen) is characterised by quick speed, especially high dependability and long service life.

The table-top cooking units from the BLANCO COOK system offer you clever technology and reliable performance for professionals.

The high-quality BLANCO design stands for top performance with regard to handling and hygiene. With rotary knob control, you can adapt your energy consumption to the capacity level.

Thanks to the compact design and a depth of just 62 cm, all table-top cooking units fit on all standard worktops and can be flexibly combined.

BLANCO COOK makes working easier!

The front cooking trio for mouthwatering cooking shows:
induction wok, ribbed griddle and pasta cooker

Details that make everyone's mouth water.

Just 62 cm deep: the modules fit on any standard worktop.

Familiar operation: the rotary knobs with continuous temperature or power adjustment ensure familiar, secure operation. The indicator lights display the operating mode.

Always at the right height: the standard height-adjustable feet are easy to adjust. This ensures you can set up BLANCO COOK in one line.

Easy to clean: micro-polished stainless-steel surfaces, large radii, seamlessly welded-in cooking and frying zones simplify cleaning – for outstanding hygiene and optimal, clean working conditions.

Safe handling: practical drain plug, easily accessible catch tray for grease and cooking residues and large-dimensional safety drains for liquids ensure safe working conditions without risk of injury.

NEW: two intelligent induction hobs and a large, high-performance griddle.

New to the team

2-zone induction hob

Frying and keeping hot? The 2-zone induction hob can do it all at once. Higher efficiency through automatic pot detection.

Surface induction hob

Surface efficiency! The rectangular hob provides concentrated energy for pans and casseroles.

Griddle, flat

A small fish or a large turkey breast – this griddle does it all. Separately adjustable heating zones make efficiency possible at the touch of a button.

MODULAR

High-performance table-top cooking units for cooking, grilling, stir-frying, deep-frying and keeping dishes hot in front cooking and catering.

Induction hob

It detects the pot and generates an electromagnetic field which produces heat directly in the bottom of the pot. Due to its sensational efficiency of more than 90 percent, 5 litres of water only need 6.5 minutes to reach boiling point with the BC IH 5000. A welcome side effect is that because of the low heat emission, the workplace is not also heated up.

Induction wok

Energy is transferred to the wok evenly because the induction coil is adapted to the curve of the Ceran® cuvette. There is no need to fear burns because the hob and induction cuvette do not heat up.

Ceran® hob

The rugged Ceran® hob has two cooking zones, which can be set separately. The Ceran glass is 6 mm thick, unbreakable and very easy to clean.

Deep griddles

The versatile deep griddle has a recessed, seamlessly welded griddle surface made of 15 mm-thick chrome steel for perfect grilling results. The large-dimensioned safety drain ensures rapid emptying.

Griddle

Flat or ribbed – a uniform desired temperature is maintained on the seamlessly welded in griddle surface. This is virtually a guarantee for enjoying meat, fish and vegetables in top form. Excessive grease is collected in the large catch tray.

Pasta cooker

A taste for pasta – right away!
The pasta cooker offers space for up to 6 pasta baskets. The seamlessly deep-drawn water well is heating using special heating and is equipped with an opening that can be closed.

Deep fryer

The deep fryer has a swivelling heating element and an unheated cold zone on the bottom of the basin. The temperature is controlled down to the degree via a rotary knob.

Bain-marie

Food can be kept hot or presented in GN containers in a seamlessly deepdrawn well which is thermally separated from the body. The drain valve is located on the outside. There is no danger of scalding.

Hot plate

This large heat-retaining area is also thermally separated from the body. The temperature can be precisely regulated using a rotary knob.

Multi-element

Whoever views this product ends up wanting it because essential items including cooking utensils and ingredients are always within easy reach. The practical compliance with GN dimensions allows quick loading. The multi-element matches the BLANCO COOK table-top cooking units exactly.

Cam GoBox™ – Insulated Carrier Line

Cambro's latest line of insulated transporters are ideal for caterers and foodservice operators looking for an ultra-lightweight transporter that offers superior temperature retention to protect food safety and excellent durability to withstand heavy commercial use, all at a budget friendly price. Just take them and go!

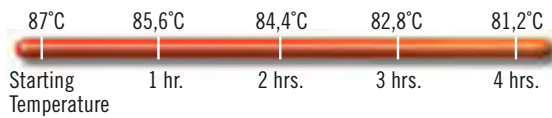

- Thermal Insulation- Holds hot or cold food for many hours.
- Lightweight- Made of EPP (Expanded Polypropylene)- an eco-friendly, high-performance foam material.
- Great Structural Strengthcapable of handling significant loads while maintaining its shape and form.
- Excellent Energy Absorption- can withstand substantial impact without damage.
- Chemically Inert- unaffected by oil, grease, and most chemicals.
- Dishwasher safe.
- CFC-Free.
- 100% Recyclable.
- Line your Cam GoBox with a Cambro GN Food Pan and Seal Cover for the ultimate food safety solution. Cambro GN pans protect food and carrier to support HACCP compliance.

Cam GoBox™ – Insulated Carrier Line

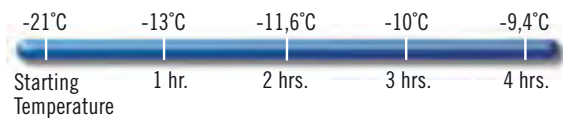

Using Cam GoBox carriers together with Cambro's polycarbonate, polypropylene or high heat GN food pans creates the ideal food-safe, HACCP-compliant holding and transport system.

Hot Holding

Cold Holding

Ergonomic Handles

Comfortable handles allow easy and safe lifting of the Cam GoBox.

Stackability

Cam GoBoxes inter-stack and also stack with major competitive brands.

Easy Identification

A built-in label area keeps plastic menu tags (included for EPP300 and EPP400) in place for easy content identification or routing. StoreSafe Labels can also be used with Cam GoBoxes.

Easy Loading and Unloading

Interior wall recesses make loading and unloading easy for both GN 1/1 as well as 1/2 pans.

4-Sided Handling

Thoughtfully designed built-in handles along the top of the front loader units allow them to be easily carried from all four sides.

Drip-Resistant

Built-in condensation barrier helps front loaders to remain drip-resistant.

Gentle Open and Close

Beveled door edges ensure door can be easily closed and latched.

Full 270° Access

Durable hinges and latches allow the door to open 270° and remain open securely to the side of the front loader for easy access to products. Latches keep door securely closed during transport.

Electric Heated Ultra GN Pan Carrier & Ultra Camcart 加热大型保温车

- Designed for both electric hot holding and non-electric transport.
- Gentle, 150° to 165°F non-radiant heat will not cook food and maintains food moisture.
- Holds a wide variety of foods such as pasta, bone-in fried chicken, and double-crustured pies.
- One hour preheat time from room temperature and three minute recovery.
- Energy consumption is substantially less than comparable metal cabinets.
- Will not rust or dent like metal cabinets, is more economical, and is easy to maneuver.
- All UPCH models have been tested to maintain at safe, hot food temperatures, for up to 4 hours when unplugged.
- Models with only the top heated door offer unique versatility with an electric hot holding cabinet on top and passive hot or cold food holding on the bottom.

Power On and Heat On Indicators

Communicate the Power and Heating status of the UPCH1600 unit. Know instantly when the compartment has reached target temperature.

Vents

Consistent heating throughout the compartment is generated by vents that constantly circulate heat from front to back.

Tough Exterior

All UPCH units are made of tough polyethylene with polyurethane foam insulation to keep heat in while keeping the exterior cool to the touch. Will not crack, dent, chip, rust or break.

Insulation

CFC-free, foamed-in place polyurethane foam insulation will hold temperature above 148°F for up to 4 hours when used unplugged.

Combo Cart™ Plus (Electric)

电综合食品车

- The most versatile insulated transporter on the market! Holds food pans, sheet pans, trays and even large pizza boxes.
- Two separate compartments offer the flexibility of holding either hot or cold food by simply keeping it unplugged.
- Tough, durable polyethylene exterior will not dent, rust or chip and remains cool to the touch during operation - a great alternative to metal holding carts!
- Thick, CFC-free polyurethane insulation throughout the cabinet ensures excellent food quality and temperature retention for 4 hours or more, even when unplugged.
- Over 50% more energy-efficient, on average, than leading metal carts.
- Ideal for caterers, schools, hotels and large institutions.

STAINLESS STEEL UNIVERSAL RAILS

Holds sheet pans, food pans, pizza boxes and trays (or limitless combinations of these!)

ENERGY-SAVING HEATER

compared to leading metal carts! Gentle, non-radiant heat circulates consistently from front to back of the cabinet.

POWER ON AND HEAT ON INDICATORS

Communicate the power and heating status of the unit. Know instantly when the compartment has reached target temperature. Turn on and off without unplugging the cord.

GASKET-FREE DOOR

Worry free door! Swings open completely to the side.

MARINE RAILING

Creates a bonus staging area for food pans.

MENU POCKET

Allows for easy product ID with either an index card or by writing directly onto smooth surface with a grease pencil.

CASTERS

All swivel with brakes for smooth positioning and navigation; non-marking.

CORD KEEPER

Stores 9' (2,7 m) power cord neatly and safely.

PERIMETER BUMPER

Protects cart and walls.

ERGONOMIC VERTICAL MOLDED-IN HANDLES

Will never break; great for maneuvering by operators of all heights.

SOLAR DIGITAL THERMOMETER

Monitor internal cabinet temperature at a glance.

WIDE PADDLE LATCHES

For easy opening and closing.

INSULATION

CFC-free, polyurethane insulation throughout the body and doors maximizes heat or cold retention for 4 hours or more.

Ingredient Bins & Camcrisper®

Ingredient Bins

- Store bulk dry ingredients such as flour and grain.
- Hygienic clear sliding lid reduces handling and allows for quick content identification.
- Bin made of FDA-accepted material so no liners are needed.
- Designed to fit under standard work tables.

Camcrisper

- A self-contained system for brining or storing, washing and transporting bulk produce.
- Prevents cross contamination and minimizes unnecessary handling.
- Transfer dry produce out of cartons into bin, cover and roll into cooler for safe storage.
- Wash and rinse produce for easy and safe prep.

Casters feature wide wheels for excellent stability and weight bearing capability.

Camshelving®

ELEMENTS Series

Camshelving® Elements Series

STRONG TECHNOLOGY

- Composite material is as strong as steel.
- 1980 mm traverse is the longest and strongest in the industry; supports loads up to 272 Kg per shelf.
- 60% lighter in weight than steel; easy to set up, adjust and change configurations.
- Resistant to moisture; won't rust or corrode.

HYGIENIC DESIGN

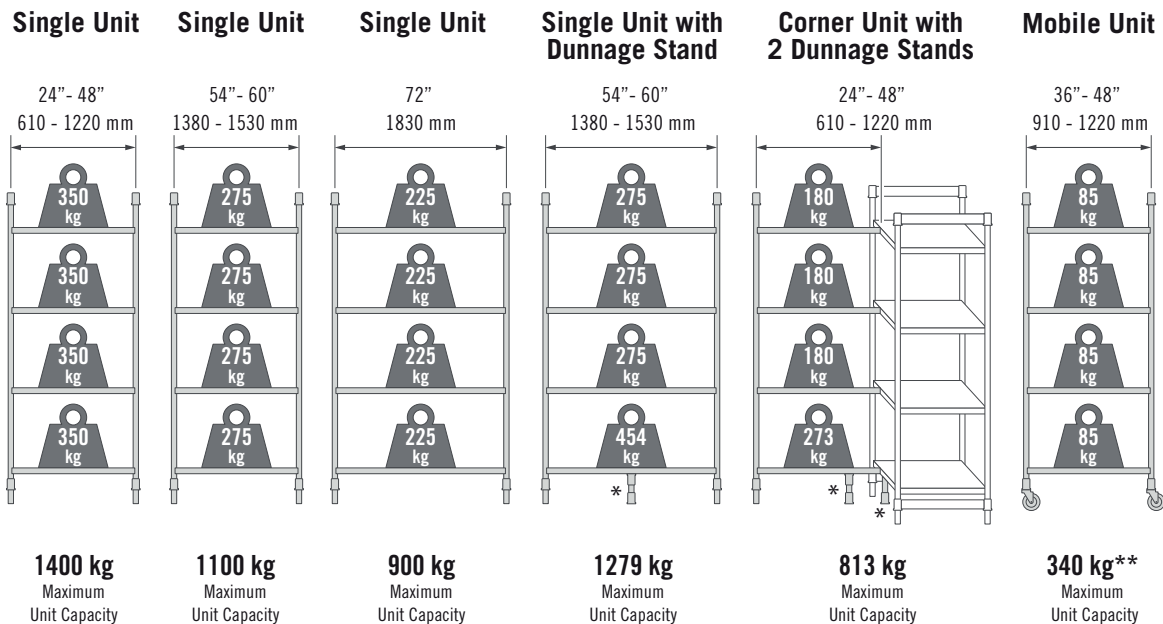

- Non-porous surface simply wipes clean.
- Shelf plates are easily removed for thorough dishwasher cleaning.
- Camguard® Antimicrobial protection is permanently embedded in shelf plates.
- Camguard works continuously to suppress the growth of microbes between cleanings.

SHELVING FOR LIFE

- Lifetime warranty against corrosion and rust.
- Withstands temperatures as cold as -38°C or warm environments up to 88°C.
- Ideal for wet, dry, cold or humid environments.
- Impervious to moisture and chemicals.
- Won't peel, dent or warp; corrosion resistant.

4 Shelf Unit Weight Bearing Chart

* Dunnage Stands add stability and increase weight bearing capacity on bottom shelf only. Add to any shelf length. Highly recommended for Starter Units 1380 mm (54") and longer, all Corner Units, U-Shape Units and units specified for heavier loads.

** Due to the weight bearing capacity of casters, maximum weight load on an entire Mobile Unit is 340 kg.

Aluminium High Density Shelving System

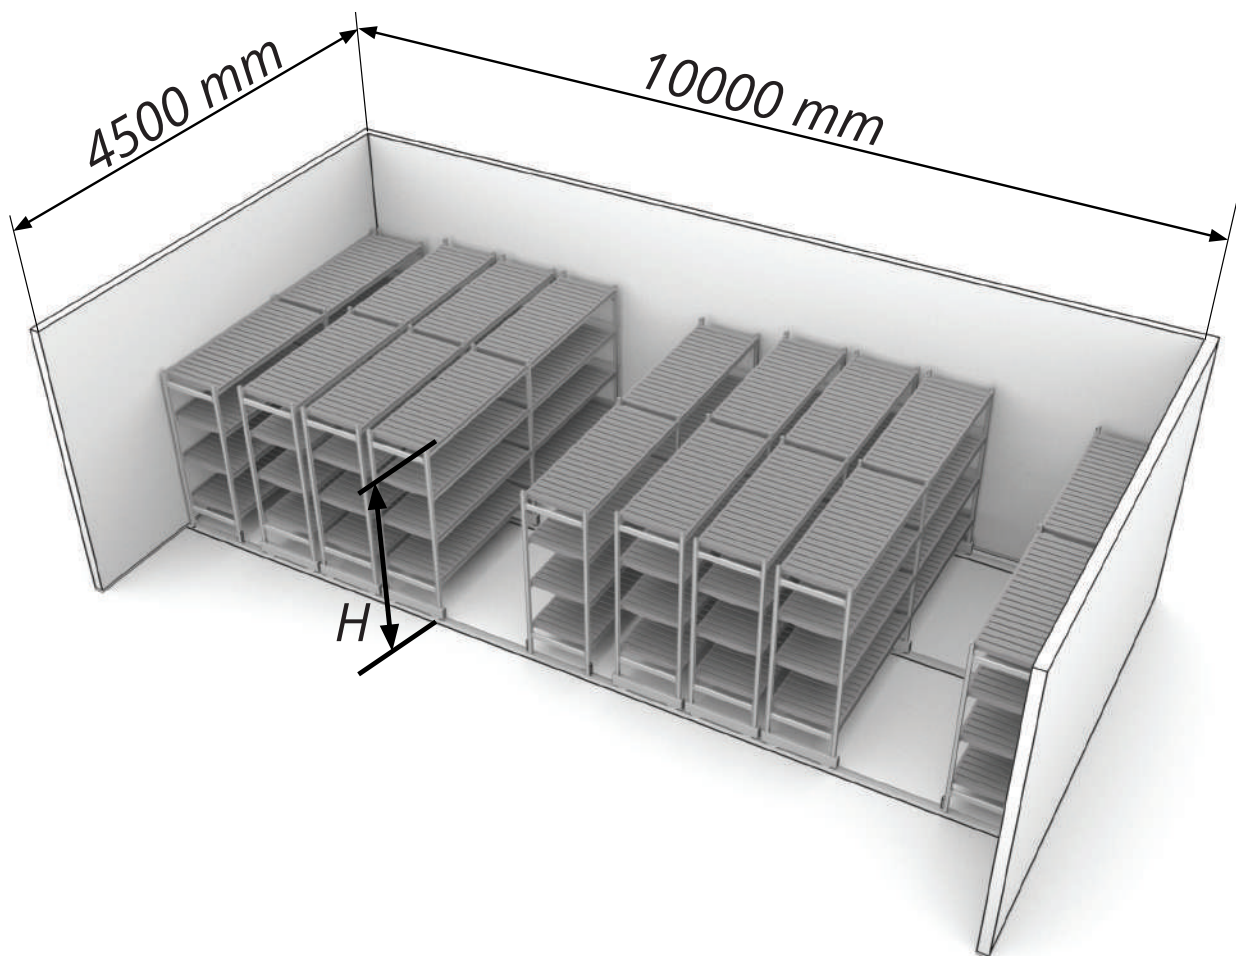

HIGH DENSITY SHELVING SYSTEM

The high density shelving system allows a better exploitation of the space increasing the storage capacity compared to a normal fixed shelving.
Build with 20 micron anodized aluminium, the shelving is entirely steel and ideal for cold storage.

Slats of the shelves are removable and dishwasher safe.
Developable indefinitely in width and length.

The slats are available in polyethylene or aluminium, certified for direct food contact.
Polyethylene is non-toxic, chemical resistant and with low hygroscopic absorption.
All hardware is stainless steel and is hidden within the structure itself.

Resistant to wear over time and insensitive to temperature changes.
The Eko Fit assembly does not require the use of any tool.

CAMBRO®

Camrack® 4-in-1 Warewashing System

The Camrack® System will protect glassware and keep it clean until the next event, eliminating the need for rewashing.

Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying.

Long-lasting polypropylene Camracks are built to withstand chemicals and high temperatures up to 200°F (93°C).

Sanitary Storage

Closed outer walls keep fingers and contaminants out and reduce risk of breakage and injury. The Camrack cover and Camdolly make this system completely enclosed. Glassware stays clean when in storage, so operators will only have to wash items once.

Inventory Control

A variety in base rack colors help identify at a glance both contents and quantity per rack. Available in 10 colors.

Safe, Sanitary Transportation

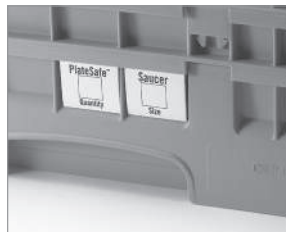

Camracks can be transported across large campuses or to off-site locations in one single unit.

Easy to grip handles and smooth overlapping sides facilitate safe handling.

Camrack Cover Seals from the Top and Camdolly® Seals from the Bottom.

Camracks interstack with racks from major manufacturers.

Content labeling options include one-color custom hot stamping or pre-printed clips that are added at factory during assembly.

Camracks are covered by one or more of the following patents: Full Base Dish Rack D412,607. Half Base Dish Rack D404,176. Half Dish Rack Extender D400,321. Enlarged Dish Rack Extender D399,614. Dish Rack with Extender 5,934,486 Utility Patent. Pronged Base Dish Rack D403,472.

UNICA WAREWASHING HANDLING SYSTEM

Molded in one-piece with double-wall construction from PP Polymer, the **UNICA** Washracks are resistant to heat and chemicals. They are available in the standard size of 500mm x 500mm. Base racks have comfortable handgrips on all four sides facilitating handling. For added height and protection, use our **UNICA** “clip-on” extenders. With the **UNICA** Warewashing- Handling System, you can create the system most suitable to your needs

Four Way Tracking System
Allows your racks to be used for all dishwashers. Allows for fast loading in any direction. No more lifting and turning before loading.

New Snap-On Feature
No more nuts, lost screws or bolts
Allow for fast, simple and easy assembly of our extenders without screws, bolts and nuts. (works without any fasteners) Added heights can be done with ease. Extenders will not separate once installed ensuring protection of valuable glassware and cutlery. No more rust from screws & nuts ensuring hygienic racking system & peace of mind.

Textured Surface
Hides nicks & scratches even after years of service.

Open Design
Open bottom and sidewall designs allows for maximum water circulation for thorough washing and drying.

Hand Grips
Comfortable handgrips on all four sides

Molded in one piece with double wall construction providing extra strength & durability.
Our racks are chemical and heat resistant to withstand heat and impact to provide years of service.

Tappo versatore SteadySpout

SteadySpout pourer

Code: 7042101

STEADYSPOUT

THE INNOVATIVE CONTINUOUS POURER

With SteadySpout, the rate of pouring is always constant at 157BPM, the unit of measurement used by bartenders to perfectly calibrate the quantity of liquid in the preparation of cocktails.

NEVER

ALWAYS LIKE NEW! Special plastic with "memory" returns to the original shape simply by putting it through the dishwasher.

STURDY

THE PERFECT SYNTHESIS! Composed of only 2 pieces rather than 4. Sturdier and more resistant to wear and tear. Longer duration compared to the other competitors.

ACCURATE

ABSOLUTELY EFFECTIVE! Pouring speed of the liquid guaranteed by the air intake. No spills either at the start or end of the pouring. Perfect for the jumping technique.

UNIVERSAL

UNRIVALLED GRIP! Design and material of the reed valves offer maximum grip. The double diameter module makes it suitable for bottles with necks of diameters from ø18 to ø21.5 mm.

PATENTED

ITALIAN PRIDE! Conceived, developed and entirely designed by PIAZZA's technical office. Entirely manufactured in Italy

TECHNICAL SPECIFICATIONS

- Reed in AISI 304 18/10 laser processed stainless steel
- Perfectly calibrated diameter, tapering and inclination of the reed, both inside and outside
- Dishwasher friendly

REVOL ODE TO NATURE

Bathing in the softness of the sun's rays, the buffet appears as if by magic. In one instant, our senses are awakened. The heady smell of undergrowth and the raw materials simply transformed appeal to our appetite. The richness of the textures and the rhythm created by the different heights of the accessories guide our eyes. Nature is here, radiant and generous.

TIMELESS & ELEGANT

TIMELESS & ELEGANT

The "classic chic" feel is a subtle balance between refinement and simplicity. The porcelain's luminous white unifies whereas the satin black creates contrast. Through its slender lines, the metallic architecture of the displays brings structure; the cloches - in all of their transparency - enhance the dishes.

An economical service tray for restaurants, bars and banquet service. General, all-purpose, non-skid service trays help reduce spills and breakage. Special non-skid surface is bonded directly into a lightweight polypropylene tray. Dri-Stak separators allow air to circulate freely over and under each tray for fast drying.

• Lightweight, weighs up to 30% less than wood room service trays. Dishwasher safe once a day, easily wipes clean. Saves time and labour. Standard 14" x 19" tray mat can be used on the surface of the tray.

PIAZZA's tongs have always been the collection used as reference point for the market, both for design and for the effective superiority of a product that is a must for every professional's collection.

Lastly, the details highlight the uniqueness of each individual pair: the curvature of certain applications, such as the spaghetti tongs, which is like an invitation to gather up the food in the best way; or the spring which always gives the same manoeuvrability even after an infinite number of pressing, this thanks to an exclusive production device which is still secret today, as are the formulas which for years have resisted all attempts of imitation. Precisely this certainty permits Piazza alone to guarantee the inalterability of its tongs.

Electric Hot Fudge Server

Hot Fudge Dispenser Warmer with Pump
Operate with Water Bath

Delicious hot fudge can really enhance the appeal of ice cream sundaes or other sweet treats. This hot fudge dispenser helps you keep the topping at the proper consistency and temperature, and pump out a measured amount of hot fudge. This unit comes with the bath warmer base and pump; it is designed for use with a #10 can or a 3 quart stainless steel jar (sold separately-see "related items" below for information on how to purchase). This dispenser from Server Products is made to hold up to regular use, and dispense an amount from 1/4 ounce to one ounce amount with every pump (adjustment collars are provided).

84580

Code	4124601
Power	500 watts
Voltage	230V

Capacity	2.8 L
Dimension (l x d x h)	19.7 x 33.2 x 39.1cm

Electric Food Server

The Supreme™ style warmers dispense cheese, fudge or caramel topping in a compact footprint. They are constructed of stainless steel with a black thermoset plastic top and bottom. To eliminate burning or scorching, the water bath warmer features an adjustable thermostat that senses the temperature of the food and turns its 500 watt heating element on or off as needed. A water fill line within the well eliminates overflow accidents.

This 230V model with UK style power cord has a pump and spout warmer that dispenses opposite instrument panel side from 2.8L stainless steel jar (included). A 30ml serving is the maximum portion which can be reduced in 7ml increments, using the supplied gauging collars.

Electric Single Cone Dip Server

Server Cone Dip Warmers are constructed of stainless steel and simply designed for years of trouble-free service. A unique, tubular heating element warms your dip coat by natural convection eliminating the need for a water bath. Temperature is determined by a low to high setting ranging from ambient to 65° C. This unit is NOT a water bath warmer and should not be used as such.

The Triple Cone Dip Warmer includes a stainless steel jar for dip coat. The top with hinged lid is removable with flanges that extend down into the jar to prevent dripping into the warmer. The bottom piece is also removable.
