

Catalogue 2016/17

Born from a laboratory of glass masters almost two centuries ago, nowadays Bormioli Rocco Group is an International establishment which counts more than 2,000 employees and about 500 million Euros of turnover. The two business units - Casa and Pharma - leaders in their respective markets, export their own products toward more than one hundred countries. Bormioli Rocco is one of the most prominent glass manufacturers in the international scenario.

Since 1825 Bormioli Rocco has inspired the stories written around the tables of the most demanding consumers and the most qualified professionals through an offer of products that are recognized all over the world for the Italian quality and style.

Bormioli Rocco introduces inAlto, the new top-of-the-line for the most demanding restaurants and hotels. InAlto represents the leading edge of R&D at Bormioli Rocco. The new inAlto offer by Bormioli Rocco interprets style and fine quality in an exquisite expression of creative flair that has developed new, modern and elegant forms of designer stemware, tumblers, jugs and decanters combined with unprecedented technological progress, raising the aesthetic and quality parameters to new heights. InAlto, at the top like the Italian way of life, a synonym for art, elegance and good taste. "In alto i calici" (the traditional "Raise your glasses") is our toast to inAlto, a collection with an Italian heart, looking out of the world.

High Quality

Leading edge Italian design, attention to detail, the perfect clarity of crystal glass "Star Glass" and the resilience of XLT treatment are the main ingredients of this new proposal created specifically for the most prestigious restaurants and hotels.

STAR GLASS - CRYSTAL GLASS

CRYSTAL
GLASS

Incomparable purity and clarity, in an even more elegant service focusing on wine.

XLT - TREATMENT

EXTRA
RESISTANCE

Stem resistance is guaranteed against the most frequent causes of breakage such as washing, twisting and daily use. The treatment lasts for the whole useful life of the product.

QUALITY PLUS

◇ 01

Laser cut rims are even thinner and more precise.

◇ 02

Improved distribution of molten glass means even less weight.

◇ 03

The pulled stem is elegant and symmetrical.

◇ 04

The new foot is elegant, thin and flat for maximum stability.

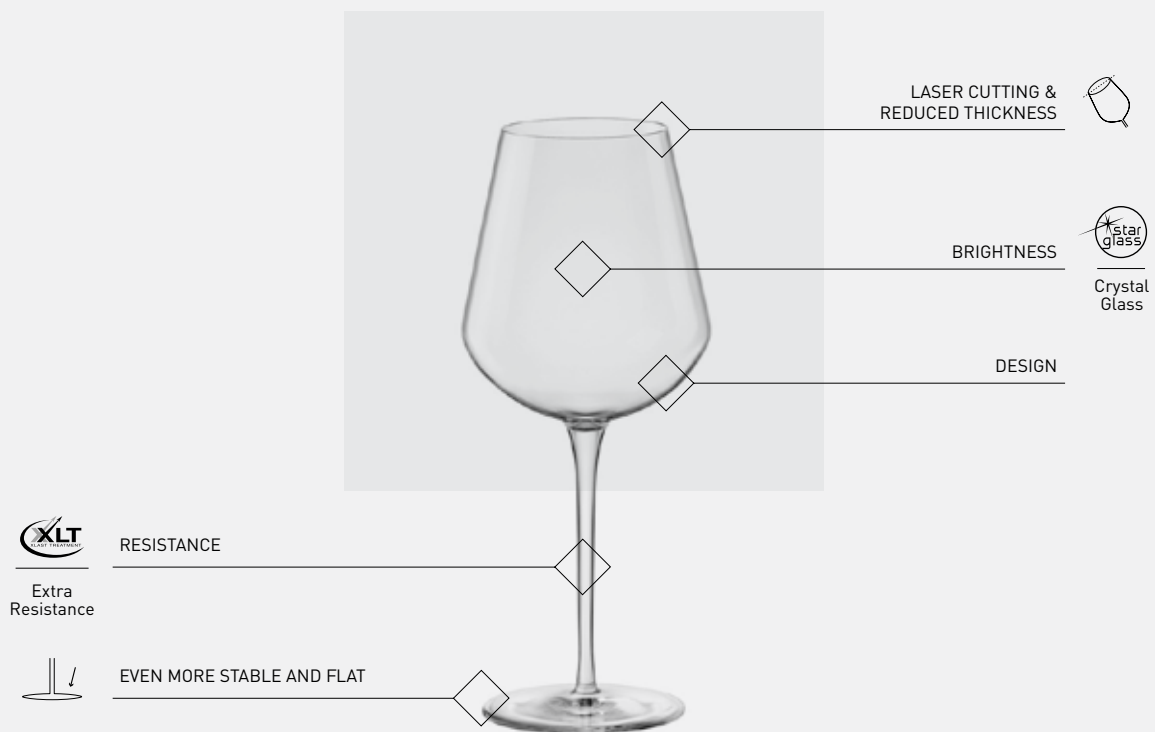

INALTO

U N O

INALTO
UNO

Italian design, a care for detail, the clarity of superior Star Glass crystal glass and the resilience of XLT treatment are the main features of the UNO collection.

An exclusive Aldo Cibic design guarantees originality, elegance and a perfect balance of proportions that combine with extraordinary lightness and perfect distribution of the glass. UNO does not merely stand for design, but also for strength and functionality. Strength, thanks to the exclusive XLT treatment, which makes the glass stems even more resistant over time. A tough and invisible shield protects the stem from the most frequent causes of breakage (washing, twisting and daily use) and prolongs its sturdiness even after repeated washes. Functionality, because the practical lightness of the bowl combines with the special foot to ensure the stemware remains extremely stable on the table. In addition, it is so flat that there'll be no more unsightly residues at the bottom after washing in the dishwasher.

INALTO

TRE SENSI

INALTO

TRE SENSI

TRE SENSI is inAlto's homage to the art of wine tasting. Sight, smell and taste are, in fact, the three senses involved in tasting activities. Sight: an excellent visual examination of the wine is ensured by the transparency of the Star Glass, which is absolutely colourless and free from impurities. Smell and taste: Exclusive partnership with the Associazione Italiana Sommelier (AIS, Italian Association of Sommeliers) has resulted in a new shape that heightens the performance of every type of wine. The bowl, wide at the base and narrowing at the mouth thereby concentrating the aromas in the upper part of the glass, and the ultra-thin rim, are perfect for enjoying every nuance in the flavour and fragrance of the wine in an unrepeatable sensorial experience. Just like the UNO collection, TRE SENSI is also synonym of excellence thanks to the flatness and stability of its special foot and its lightness, which combines with the strength of the exclusive XLT treatment to make the stems even more resistant over time. A tough and invisible shield protects the stem from the most frequent causes of breakage (washing, twisting and daily use) and prolongs its useful life even after repeated washes.

INALTO

INVITO

INALTO
INVITO

Elegant, contemporary, ergonomic, the INVITO decanter is an ideal way for enjoying the most prestigious wines at their best. The dome at the bottom is the distinctive element of the design and has a double function: to accentuate the swirling movement of the wine, thereby encouraging the oxygenation process, and to make the decanter easy to handle while serving. Uncork the bottle about 8-10 hours before consumption and pour the contents into the decanter: you'll soon find how perfect it is for aged red wines, as they become separated from the sediment in the bottle, as well as for young red wines and mature white wines, which can express their aroma to the full.

Electra

Electra

[a] LASER CUTTING

For thin rims that enhance the perception of wine qualities and elevate the tasting experience

[b] REDUCED THICKNESS

Excellent distribution of glass around the rim and along the sides

[c] STAR GLASS

Bormioli Rocco's innovative and exclusive chemical composition that produces an ultra-clear, highly transparent glass

[d] PULLED STEM

A particular process whereby the stem is pulled from the same gob of molten glass as the bowl ensures elegant shapes, ultra-high strength and flexibility

[e] XLT

The exclusive reinforcing treatment that strengthens the stem and protects it over time

SOMMELIER ITALIAN ASSOCIATION

In partnership with Italian Association of Sommeliers

ASSOCIAZIONE
ITALIANA
SOMMELIER

Electra is a complete collection designed to fully satisfy the most demanding restaurant managers. The modern lines are ideal for elegant contemporary table settings and the original double cone shape ensures adequate oxidation and coherent perception of the aromatic components. The technical characteristics of the Electra line comply with the most exacting requirements as to functional and practical use: the innovative material, Star Glass, contributes brilliance and neutral colour; the exclusive and timeless XLT treatment extends the resistance to use, impact and washing in industrial dishwashers.

Riserva

Riserva makes the act of wine tasting a more accessible daily activity. The ample range of shapes is particularly appropriate for restaurants, wine bars and in general, for less formal situations without forgoing the clarity and brilliance of Star Glass and the fine quality of the laser cut bowl rim.

The availability of glasses with capacity marks completes the range and satisfies the requirements of restaurant and cafe managers alike.

Every Day

Verso

Practicality combines with versatility. The new Verso stemware is an ideal solution for daily use in various situations. The contemporary lines of the four different sizes available make this stemware ideal for all kinds of wine as well as other beverages. Verso stemware is also perfect for water, cocktails, soft drinks, juices, while for sparkling wine, there's a flute to complete the series. The best quality-price ratio brings a touch of elegance to the table.

New Kalix

TEMPERED GLASS

High resistance to thermal shock, impact and machine washing cycles

PULLED STEM

A particular process whereby the stem is pulled from the same gob of molten glass as the bowl ensures elegant shapes, ultra-high strength and flexibility

New Kalix is a tempered glass series characterized by a pulled stem and reinforced bowl. This combination of sturdiness and elegance is ideal for catering and banqueting use. The tempered glass remains unaltered over time even when subjected to frequent industrial washing cycles because it is 2,5 times more resistant than ordinary non-tempered glass.

Regolo

STACKABILITY

Space saver shapes designed to economise on storage and transport

TEMPERED GLASS

High resistance to thermal shock, impact and machine washing cycles

Regolo was created to provide a functional and practical answer to the requirements of the professional catering sector. The new glass, available in two capacity sizes, features the sturdiness of tempered glass and is perfect for stackability. Thanks to its dimensions, it is also ideal for use on canteen trays.

DNA **COLOR**

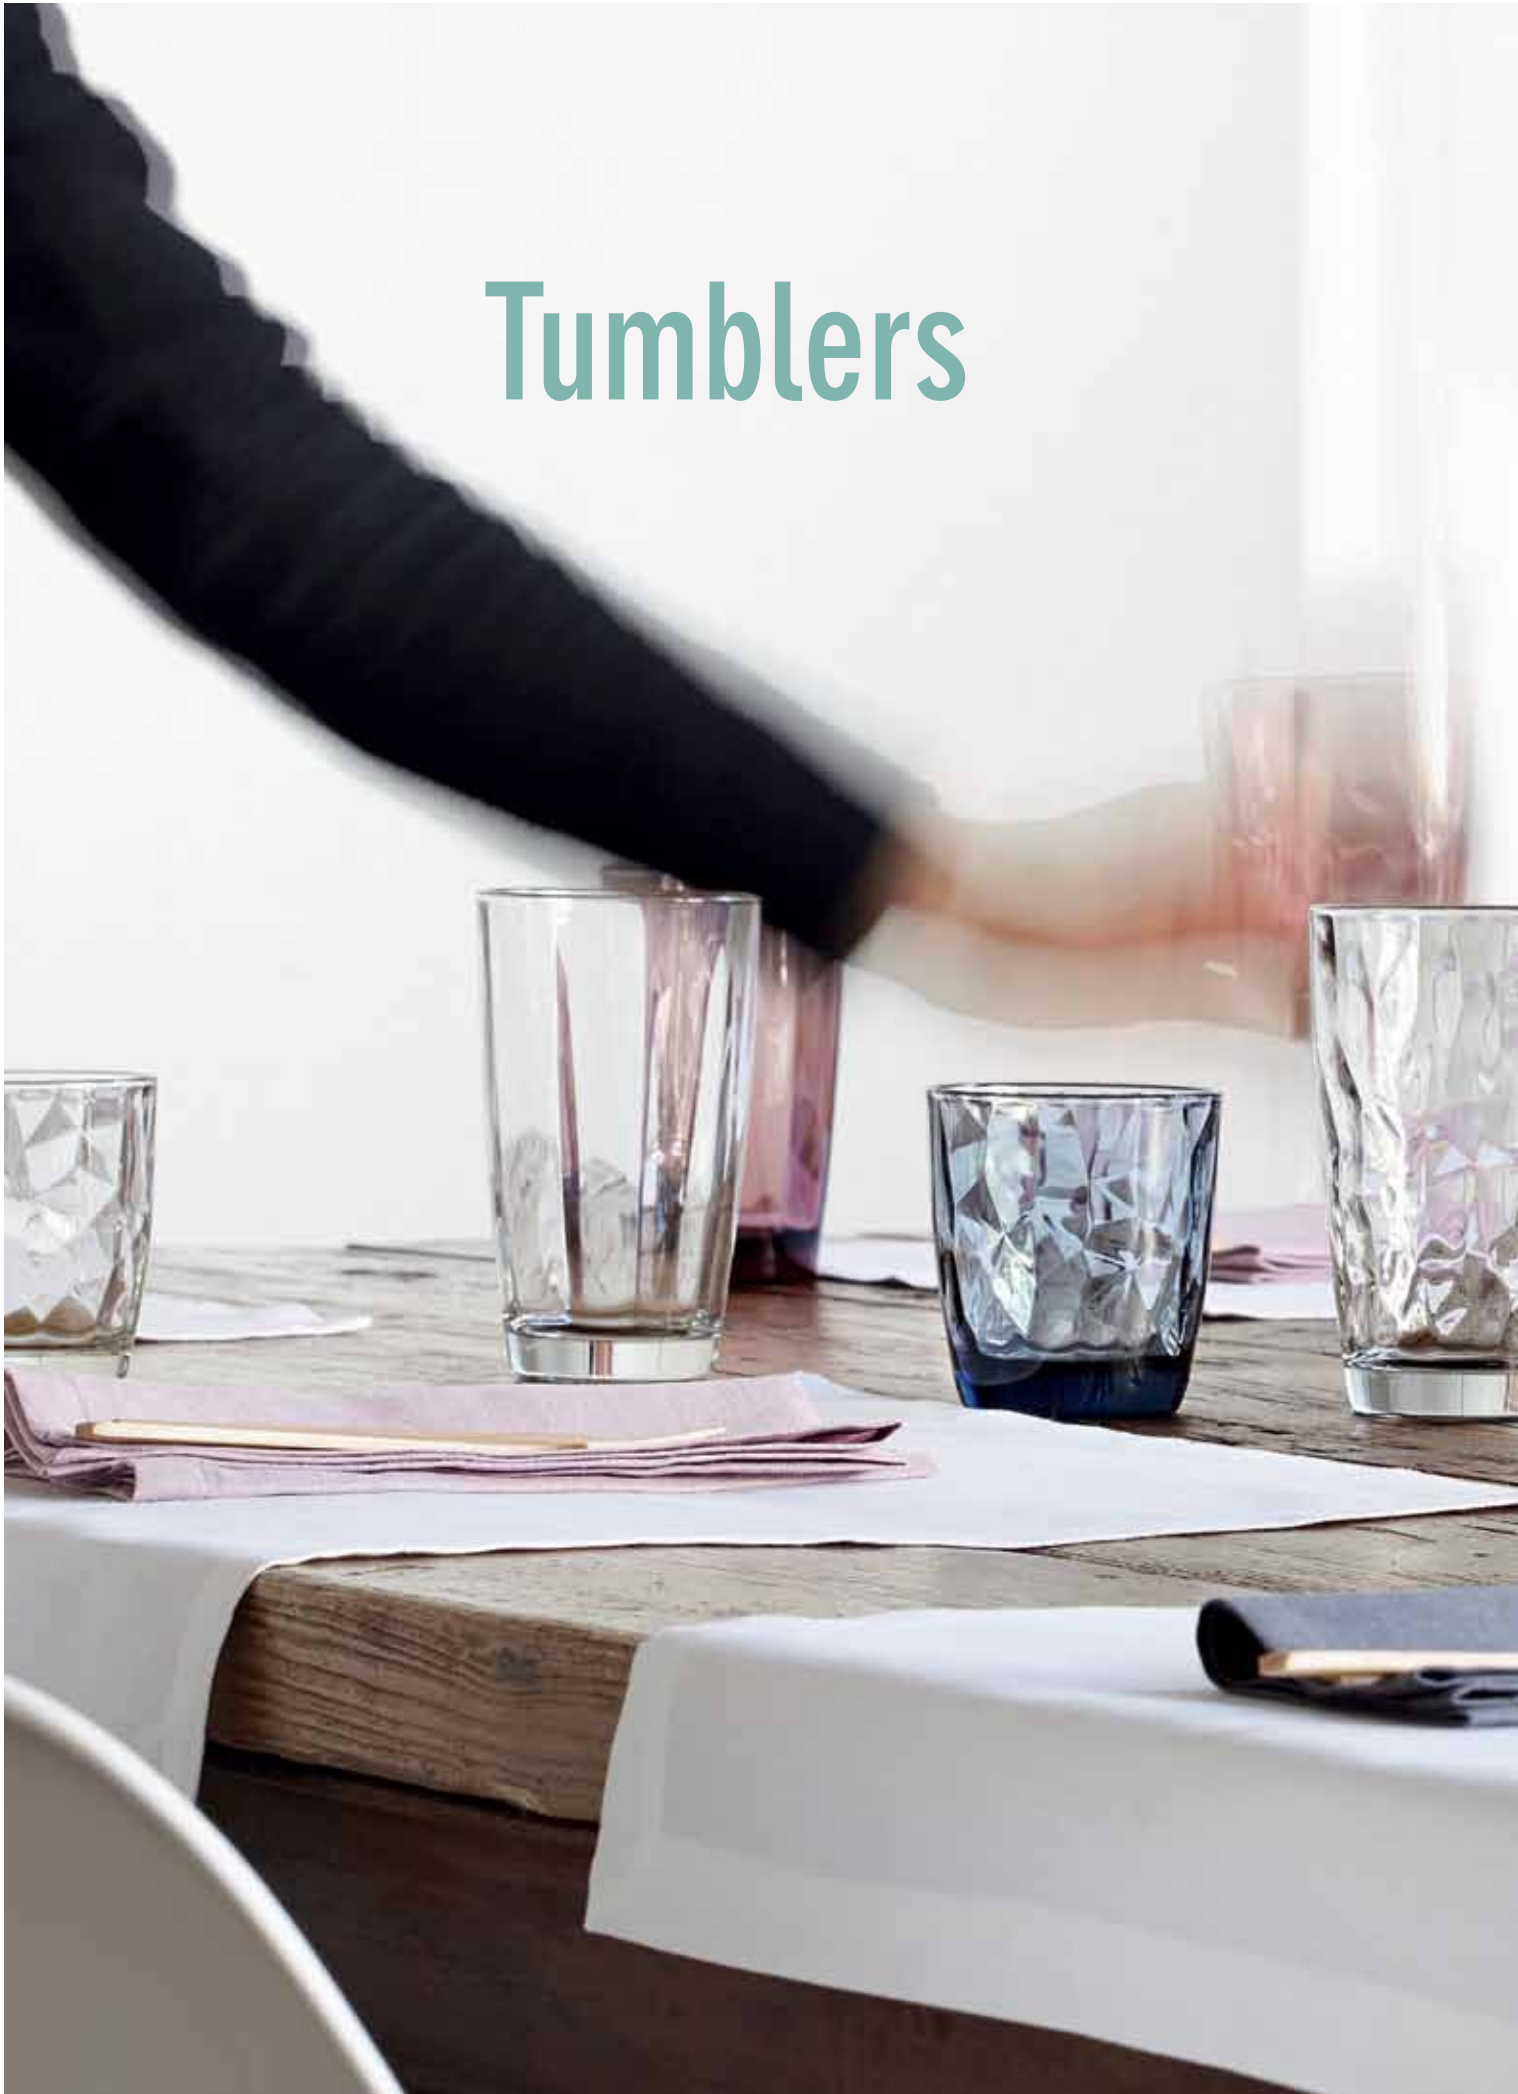

A graphic logo consisting of several overlapping triangles in shades of purple, pink, blue, and green, arranged in a cluster to the right of the text.

DNA Color is the exclusive colouring technology which stems from the ultimate essence of glass itself, from its very DNA.

For their whole life cycle, glassware items keep proving colour fastness against washing in the dishwasher, impacts and chipping. The typical characteristics of glass such as brightness, transparency, recyclability and hygiene also remain unchanged.

Rock Bar

Rock Bar

[a] FULL MASS-COLOURED

Permanent colour that lasts for the entire life of the product, resistant to abrasions and frequent washing cycles

[b] TEMPERED GLASS

High resistance to thermal shock, impact and machine washing cycles

[c] STACKABILITY

Space saver shapes designed to economise on storage and transport

[d] DISHWASHER SAFE

The unmistakable Rock Bar & Rock Bar Lounge series were specially developed to create a complete line of tumblers and dessert bowls for cocktail bars and cafes and are perfect for serving all types of drinks and desserts.

The tempered glasses are stackable so they are extremely practical. They also withstand impact and thermal shock, while the full mass-coloured version is available in three fashionable colours.

BEER  CLUB

BEE

GLASS
GOBLETS

QUALITY

R

C

Beer Club is a complete range of glasses and goblets designed to enhance the sensorial characteristics of beer's endless nuances. Each beer can be enjoyed at its best thanks to a goblet designed specially to underscore its qualities.

L

GLASS
STEMWARE

UB

The full fragrance of beer, its flavour and many different nuances can only be appreciated if it is poured correctly. Beer should be poured slowly, with the glass held initially at a 45° angle and then gradually righted as it fills. The faster beer is poured, the greater the amount of froth will form, and this should never be less than two fingers thick. Serving temperature: 4-7°C for bottom-fermented beers; 8-12°C for top-fermented beers.

FLARED, TULIP-SHAPED GOBLET, IDEAL FOR ENHANCING FRAGRANCES. PERFECT FOR AROMATIC BEER WITH A FROTHY HEAD.

Charger & Serving Plates

[a] FULL MASS-COLOURED

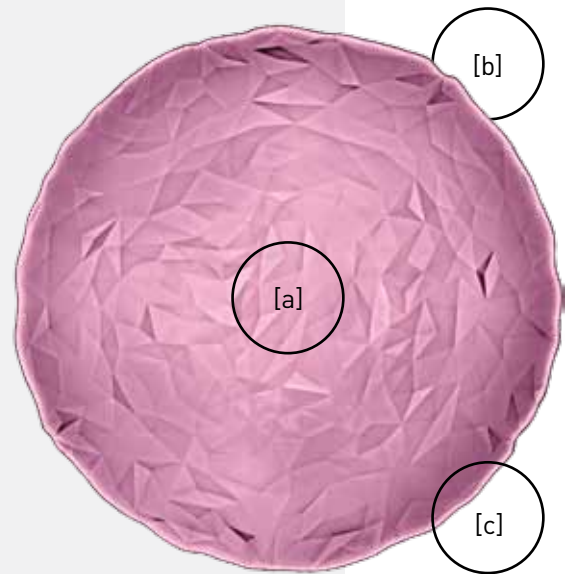

Permanent colour that lasts for the entire life of the product, resistant to abrasions and frequent washing cycles

[b] DIAMOND GRINDING

On the back of the charger plate to facilitate cleaning

[c] DISHWASHER SAFE

Diamond plates are ideal for serving appetizers, desserts and all-in-one dishes. The typical diamond grinding on the back makes these plates modern and trendy.

FOR EATING

Perfect allies of the «one course meal», the Quattro Stagioni and Fido jars come as a highly appreciated alternative to serve salads and all-in-one dishes that are ideal to take away, by guaranteeing a perfect preservation through their tight seal.

The new Aria cups are the ultimate creative solution to serve spoon desserts, finger foods to match an aperitif, creams and custards and fruit salads.

FOR DRINKING

Drinking from unconventional containers has become a consumption style rather than a fashionable trend. Perfect to shake in the same container you use to serve, glass jars and bottles enable to prepare any cocktails in advance and to perfectly preserve them so as clients can have them later either to stay or to go, by guaranteeing an impressive presentation.

Materials, technologies & plus

STAR GLASS

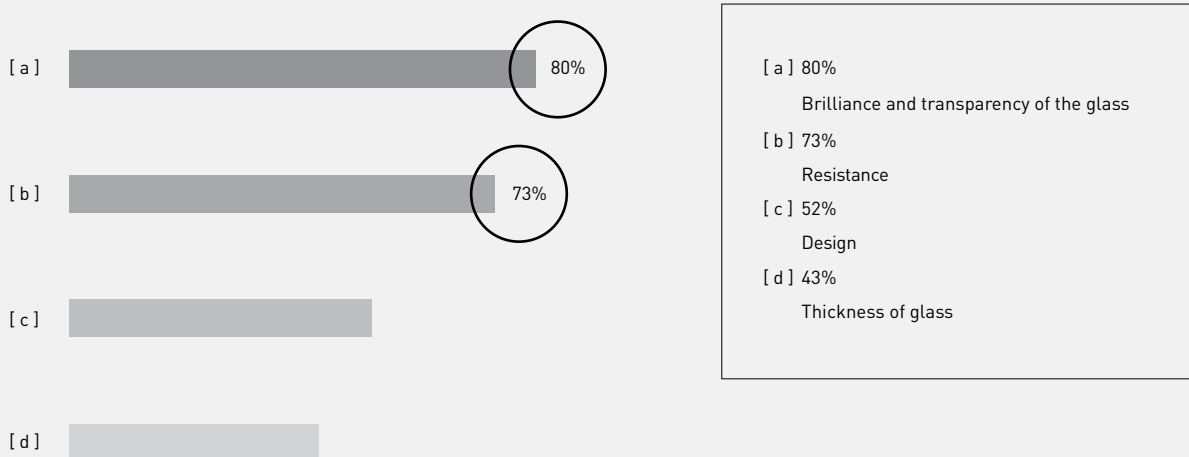

Star Glass is an exclusive chemical composition that delivers an ultra-clear and ultra-pure glass, completely recyclable because it is lead-free.

The very limited presence of impurities and colour* shades makes Star Glass comparable to crystal, in terms of clarity, although it is lighter and more practical.

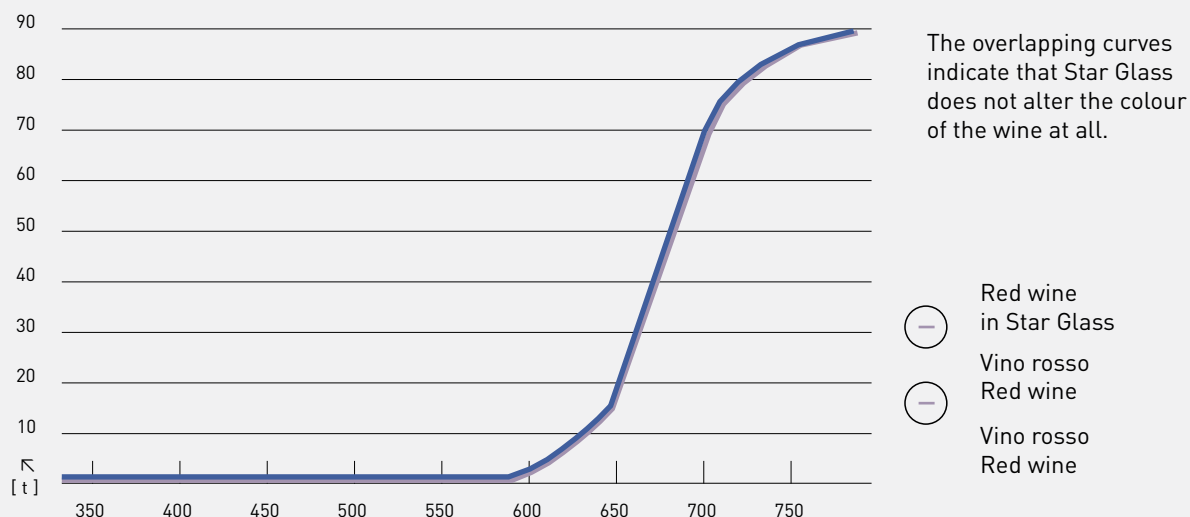

* Star Glass meets ISO IWA 8:2009 standards for non-coloured, ultra-clear glass.

CHOICE CRITERIA OF A PROFESSIONAL WHEN PURCHASING STEMWARE*

PERFECT NEUTRALITY OF STAR GLASS IMPROVES VISUAL EXAMINATION OF THE WINE**

TRANSMITTANCE

Indicator of the quantity of light which goes through the glass. Index close to 100 indicate a high level of transparency.

* Sources: Ricerca TNS condotta nel 2010 su un campione di 1400 operatori del settore ristorazione / TNS research conducted in 2010 on a sample of 1400 operators in the hospitality industry.

** Sources: Test interni realizzati dal Laboratorio di Analisi Bormioli Rocco / Internal tests conducted by the Bormioli Rocco analysis laboratory.

PRODUCT FEATURES & BENEFITS

XLT Treatment

The stem is actually the most likely breaking point of wine glasses and the intensive use conditions that are typical of the catering industry contribute to this risk. Internal laboratory tests has shown that even the smallest abrasions can weaken the stem. Even in the case of low intensity impact, the risk of breakage is up to four times greater than for stems without abrasions.

XLT is an exclusive and innovative technology developed by Bormioli Rocco to reinforce stem resistance against the most frequent causes of breakage such as washing, twisting and daily use.

XLT is an invisible shield that protects the stem from abrasions, prolonging the useful life of stem even after many washing cycles.

Stackability

Advanced design studies guarantees excellent stackability, reducing the risk of breaks. Stackable products (indicated by the logo) deliver many advantages in terms of use, because they allow to save storing room and are easy to carry.

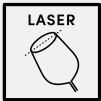

Opal Glass

The special chemical composition of Bormioli Rocco Opal Glass produces a characteristic shade of white that is ideal for tableware. The essence of the material guarantees purity, hygiene, safety and 100% recyclability to ensure eco-sustainability. The absence of porosity prevents external substances from being absorbed even if the product is slightly chipped, so maximum hygiene is guaranteed. Bormioli Rocco Opal Glass can be used to create decorated tableware that is dishwasher and microwave-safe. The tempering process provides high resistance to mechanical stress and frequent washing cycles delivering products that last longer.

Reduced Thickness

Bormioli Rocco experience and advanced technologies guarantee excellent glass distribution throughout the product body. This feature, together with the special laser cutting process, guarantees thinner rims.

Laser cutting

The special laser cutting process and rim finishing delivers uniform and thin rims, which enhance the perceived quality of wine. This technology is ideal for wine tasting.

Hygienic

The absence of porosity prevents external substances from being absorbed, even in presence of tiny fractures, guaranteeing maximum hygiene.

Pulled stem

Each stem is obtained from a single piece of glass, thanks to a special traction process. These special process guarantees the absence of microfractures - which means a more durable product - elegant and slender shapes, resistance and flexibility for an easy-to-use product.

Handmade

Each piece of Bormioli Rocco Hand Made collection is mouth-blown. In order to preserve the uniqueness of each piece no mechanical technologies are involved. The tiny imperfections, together with little differences between each piece, guarantee that each product is absolutely hand made. Hand washing is recommended to maintain the product integrity and brilliance.

Tempered Glass

Bormioli Rocco has been creating and producing a great variety of tempered glass products for over 50 years, beginning with the famous Vitrosax series that was so sturdy and versatile. During the tempering process, the glass is subjected to thermal shock: the product is rapidly cooled from a temperature of about 600°. This rapid change in temperature compresses the surface molecules so that the glass acquires much greater resistance to thermal and mechanical shock. Bormioli Rocco tempered glass is 2.5 times more resistant than ordinary annealed glass and guarantees a very high level of reliability.

Gauge Mark

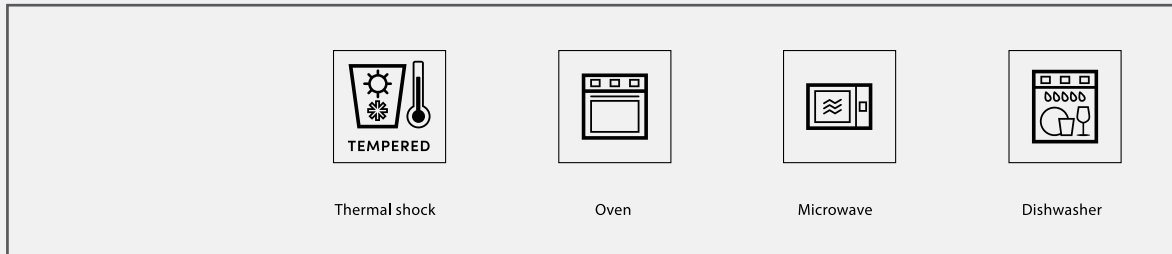

Stems, glasses and jugs, have been provided with the gauge mark, in order to allow professional caterers to pour the perfect quantity, enhancing the quality of service. The gauge mark is certified according to the Directive 2044/22/EC (MID).

ECO Friendly Sprayed Glass

Spraying the color on the external surface of the product, together with the use of organic varnishes, deliver products that are safe for food contact.

USE & CARE

Products in non-tempered glass	$\Delta T =$ 42° C 107° F	X	✓ max 70° C max 230° F	✓
Pressed tempered glass items	$\Delta T =$ 130° C 266° F	X	✓ max 130° C max 266° F	✓
Spun tempered/decorated glass items	$\Delta T =$ 110° C 230° F	X	✓ max 110° C max 230° F	✓
Blown tempered glass items	$\Delta T =$ 100° C 212° F	X	✓ max 100° C max 212° F	✓
Eco friendly sprayed glass	$\Delta T =$ 42° C 107° F	X	X	If indicated with symbol
Decorated glass*	$\Delta T =$ 42° C 107° F	X	✓ max 70° C max 158° F	✓

* These figures refer to non-tempered glass; in the case of decorated tempered glass follow the directions given to this type of glass.

N.B. Safe use of the products with the appliances indicated is subject to not exceeding the thermal shock range.
